

ABD EL-RAHMAN KHALED EID

Mobile Applications Developer (Flutter)

Beni Suef, Egypt | [+20 100 728 7335](tel:+201007287335) | [Email](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Flutter Developer with 1+ year of professional experience contributing to 8 published iOS and Android applications across company and freelance projects. Experienced in independently delivering features, optimizing performance, maintaining production codebases, and integrating REST APIs, Firebase, and Supabase. Skilled in Bloc/Cubit, Clean Architecture, debugging, QA collaboration, and mobile app releases.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter (iOS & Android)
Architecture: Clean Architecture, Feature-Driven Architecture, Dependency Injection (GetIt)
State Management: Bloc, Cubit, Hydrated Bloc
Backend & Integrations: REST APIs, Firebase, Supabase
CI/CD & Release Tools: GitHub Actions, Fastlane, Shorebird
Storage & Version Control: Hive, SharedPreferences, Git, GitHub

PROFESSIONAL EXPERIENCE

Flutter Developer — Code Link Jun 2025 – Jun 2026

- Maintained and enhanced 5 production Flutter applications, resolving critical bugs and developing modular features using Bloc/Cubit and Clean Architecture.
- Integrated REST APIs, Firebase, and Supabase; collaborated with backend, design, and QA teams and managed App Store/Google Play releases:
 - 2Deal (KSA Marketplace):** Independently developed 2Deal Community with social feeds, text/media posts, comments, and sharing; optimized scrolling performance using pagination, image caching, and selective Bloc rebuilds, with robust API/upload error handling and retry mechanisms. [App Store](#)
 - E-State (Real Estate):** Built sales operations, booking automation, and approval workflows. [App Store](#)
 - Deraman (Salon Booking):** Maintenance, bug fixing, and store releases. [App Store](#) | [Google Play](#)
 - Gader (Consultation):** Built expert volunteering and video/audio consultation workflows. [App Store](#) | [Google Play](#)
 - QSocial (Scheduling):** Implemented appointment scheduling, contacts integration, and push notifications. [App Store](#)

Freelance Flutter Developer Feb 2026 – Present

- Sole Flutter developer maintaining and enhancing two existing production applications, **Al-Hafiz** and **Iqraa**, while working directly with clients.
- Implemented session scheduling, multi-student profiles, and subscription features; resolved bugs and managed store releases.
 - Al-Hafiz** [App Store](#) | [Google Play](#)
 - Iqraa** [App Store](#) | [Google Play](#)

FEATURED PROJECT

Solix — Solar Energy Forecasting Platform (Graduation Project) [Google Play](#)

- Independently developed and published a Flutter application using Feature-Driven Architecture and Cubit.
- Integrated an AI/ML forecasting model through REST APIs to submit input data and process solar energy predictions.
- Implemented Syncfusion analytics charts, Hive caching, and automated PDF report generation.

EDUCATION

B.Sc. in Navigation Science and Space Technology — Beni-Suef University Graduated: Jul 2026 | GPA: 3.7 / 4.0
